

In 1978 when three practices joined to build a state of the art referral facility in central Oklahoma, Equine Medical Associates, Inc. was established. As a founding partner, I have had the pleasure and experience of seeing this practice grow and change over the years. In all these years, I have never lost the desire to further our profession by offering externships and internships. EMA's internship program started in 1980 and continues to invigorate the staff with each new person wanting to expand their own knowledge in the field of equine medicine.

For you Externs; we provide housing within the hospital so you can take advantage of everything that goes on in the hospital. We remember how it was as a student and therefore provide a meal allowance and for your externships longer than two weeks we include a weekly stipend. We encourage you to take advantage of your time with us by actively participating in the cases presented to the hospital and field practice.

For you Interns; our internship has evolved as the practice and its caseload has changed. We no longer have a boarded surgeon on permanent staff but utilize surgeons from neighboring practices for the more complex surgeries. That said, our case load is extensive and varied so that you can gain knowledge and experience in a supportive environment. We provide a salary base, comfortable housing near the hospital, intern vehicle, professional liability, health insurance, association memberships and license fees for Oklahoma. We feel we are very competitive with our intern package while you are gaining the knowledge to further your career.

Please seriously consider Equine Medical Associates Inc. for an Externship or Internship. Visit our web site [www.emaokc.com](http://www.emaokc.com) or give me a call on my cell 405-620-2821.
