

Internship

The goal of the internship program at Woodside Equine Clinic is to provide a comprehensive learning experience in all aspects of an advanced and progressive equine clinic.

The high volume caseload will enhance the individual's clinical competency, diagnostic skills, and communication skills.

Guidance will be provided by 8 experienced clinicians/veterinarians in the fields of lameness, surgery, internal medicine, ophthalmology, reproduction, acupuncture and chiropractic, as well as advanced dentistry. This internship experience will provide a foundation for advancement in private practice or an academic residency.

The internship is organized on a rotational basis between in-house (medicine and surgery) and ambulatory. Duties include daily care of in-house cases, assisting with surgical procedures, primary and follow-up care of routine cases, assisting with ambulatory calls and emergencies. This internship is directed toward an individual who has the desire to advance in all aspects of equine medicine and the enthusiasm to perform their duties with a positive attitude.

Current number of interns: 2
