KNOW BEFORE YOU GO FACTSHEET

VET PREP PROGRAM

WHAT WILL I LEARN AND EXPERIENCE IN MY STUDIES?

Courses in the VetPrep program include science, mathematics, and scientific writing. Case-based learning is a separate course, though its principles are used throughout the VetPrep program. Additionally, students can benefit from a transitional course that introduces them to their academic veterinary medicine program and promotes mindfulness and study skills.

Students who successfully complete the VetPrep program will be placed into first semester classes. The Admissions Committee decides who is accepted into this program.

WHAT SERVICES WILL I RECEIVE?

Services available to all students include:

- A New Student Coordinator to answer questions, review necessary visa materials, liaise with student housing as needed, and provide general support to incoming students.

- Health and wellness services available through the Student Health Services Office and Counseling Center.

- Academic support through the Student Success Center, including individual study strategy appointments, interactive study skills workshops, academic coaching, teaching assistants, and a tutor program.
