

KNOW BEFORE YOU GO FACT SHEET

WHAT WILL I LEARN AND EXPERIENCE IN MY STUDIES?

The course-based Master of Science by Coursework in One Health (MSc One Health) degree program is designed to equip veterinarians, animal scientists, medical and biological scientists with an in-depth understanding of the principles of, and issues associated with, One Health, and consists of 42 credit hours, which can be completed in either 2 years (6 semesters) or 3 years (9 semesters) option. Students will have the opportunity to explore the complex interplay of altered environments and infectious diseases as an increasing threat to agriculture, public health and endangered/threatened species, on a global basis. Our program is designed to provide students with intellectual skills in scientific assessment and research methodology, as well as practical skills in communication, organization and scientific writing.

Upon successful completion of the degree program, the student will have gained knowledge, research skills and research experience in topics relevant to the broad field of One Health. The program provides graduates the background and experience to assess, investigate and manage animal health and zoonotic disease risks, to design and execute targeted research in animal health, and to manage veterinary intervention in the control and prevention of animal disease. Within the program the student will have had the opportunity to focus on an area of interest, such as area disease control, vector borne diseases, zoonotic infections or conservation medicine.
